

# THE TY TAKEOVER

Year 2, Issue 1: October 2020

## The Return to Pres Amidst a Pandemic - A TY Perspective

*By Michaela Mahon*

On Monday the 7th of September, the TY group of 2020/2021 made their much anticipated return to school. There was a mixed atmosphere in the air, with some students feeling happy to be back, grateful that their remote learning days were hopefully behind them. Others were feeling uneasy with the “new normal” of our school life. Unlike the three previous years, this time we were returning to school during a global pandemic.

There have been many changes made to the school and new rules have been introduced in order to adhere to Covid-19 guidelines. The Junior students of the school are now in one part of the school building, while the Senior students are in their own section of the building. When entering and leaving the school all students

must sanitize our hands. We must wear a face covering when we are indoors. We have to social distance, so in our classrooms our desks are a metre apart from each other. When we leave our desks and

chairs we have to sanitize them down with a wipe. Each class group has a base classroom that we stay in for most of our subjects. Some facilities in our school such as the library, gym hall, stage and canteen, have been turned into classrooms so we have enough space for everyone to learn at a distance.

The TY's have five base classrooms: Canteen one, canteen two, the stage, the gym and the games room. We have had to get used to these new classrooms as they've never been used as classrooms before, but I think we are lucky because they were well renovated and have become good places to learn.

This TY year is going to be like none before. It's going to be very different and a TY year that none of us expected. Covid-19 is going to massively affect our year and determine what we can and cannot do throughout the year. Sadly, we won't

be able to go on as many trips as previous years. Most of our trips will be local and will of course adhere to Covid-19 guidelines. Hopefully things will start to look up as time goes on! Unfortunately, work experience has also been cancelled for most students. Work experience is a big part of the TY year so it is a shame that we will be unable to complete it. Hopefully by summer 2021, things will improve and we might be able to look for some work experience in our own time, as it is quite an important element of our teenage years.

We are lucky that we have been able to do some workshops and trips to date that we all have enjoyed and these have been memorable experiences for us. The TY's are determined to make the most out of the year ahead and stay optimistic about the future.

Overall, I think the majority of us are happy to be back at school and to have some normality in our lives again. It has been a stressful couple of months for us, filled with uncertainty and anxiety, but we got through it! I think we're all slowly settling back into school with the strange and unique 'new normal' we're all adjusting to. We are all excited for the year ahead whatever form it takes, because we all just want to make sure

we get the most out of TY. I think it'll be a good year if we keep positive, and if we follow the guidelines hopefully things will start to improve and these tough times will pass.

On returning to school, I asked some of the students in TY some questions about the upcoming school year and their opinions on being back at school.

**How are you feeling about being back at school?**

*I have mixed emotions about being back in school. I am happy to see my friends and teachers but I don't want Covid-19 to get worse.*

*-Sophie Rafter TYA*

**How are you finding the Covid-19 restrictions in school?**

*They are difficult to get used to but it's fine after a while. I think they are making a difference.*

*-Sophie Grace TYB*

**What are you most looking forward to this year?**

*I'm looking forward to going on trips with my class and my year, and getting to know more people. I'm looking forward to trying new subjects as well.*

*-Alex Murphy TYC*

**How do you think Covid-19 will affect our TY year?**

*I think there will be a lot less opportunities for us, especially to leave the school on trips, but we should make the most of it.*

*-Katie Maher TYD*

**What has been your favourite moment of TY so far?**

*Getting a taste for all the new subjects and modules. I love doing Junk Kouture.*

*-Kelly Power TYE*

## History in the Making - Cancellation of the State Exams

By Kate Brennan

As a year group, we will never forget the announcement of the cancellation of the 2020 Junior Cycle exams back in April. Many students felt gratitude and relief to be free from the stress and anxiety they would no longer have to endure. After months of living in the unknown, and little word from the Department of Education, the relief was largely understandable. Most students were very content with the way our school handled the

situation with the setting of online end-of-year tests, and it helped alleviate a lot of stress and anxiety that was felt towards the State exams.

**CANCELLED**

There are many positives and negatives to this unprecedented situation, a number of which might not be realised yet for a year or two to come. Looking to the future, some students worry about the lack of experience we will have with State Exams when it's our time to sit the Leaving Cert. One TY student expressed her concern to me about coping with anxiety for the Leaving Cert exams, *"I think it will affect us when*

*it comes to the Leaving Certificate and dealing with the pressure of it all. We only got a taste of the stress we would feel with the JC mocks, and the LC will of course, be much more intimidating"*. There will no doubt be much discussion about this year's exams- or lack thereof, for some time to come, and only in three years time will we learn the full impact of their cancellation.

In the meantime, we are all happy to be journeying through a stress free Transition Year! We are now back in school a full eight weeks after six months of lockdown, and the familiarity of school has become part of our lives once more - even if it is a new kind of familiar. The Junior Cert-that-never-was feels like an afterthought now. Looking back on Spring this year, we Pres girls can only feel grateful for our dedicated teachers and practical school who cared for our wellbeing and provided the best possible exam-solution for the end of our three Junior Cycle years. I have no doubt that our unique year group will forever remember our Junior Cert year... the year we didn't actually do the Junior Cert!

### TY Representatives Elected

by Eilis Doherty

The following students were nominated by fellow classmates to represent each TY group this year:

#### TY Prefects & Vice Prefects

TY1: Elizabeth Jenson & Sophie Rafter

TY2: Sarah Nolan & Denise Foley

TY3: Clíodhna Murphy & Aoife Coverdale

TY4: Diana Ibe & Aimee Quinne

TY5: Ciara McHugh & Alva Power

## Guest Speakers & Visitors

### Marc Mulligan Motivational Talk

*By Rebecca Holden*

On Tuesday, 8th September, professional speaker Marc Mulligan delivered a speech to all Transition Year students. The Transition Years wanted some inspiration for the year following the return to school, and Marc was the answer. We were separated into different groups and went to the hall for the talk. Marc addressed the topic of fear which was very important to us as there was an anxiety felt returning to school amidst a global pandemic.

Marc spoke to us about the fear of failure which is something we have all experienced at some point in our lives. The fear of failure is difficult to overcome, unfortunately the majority of people never do overcome it. We also learned the names of different phobias and what they mean. At the end of the talk, Marc called for three volunteers to come up and put their hand in a box without knowing what was in it. He

asked them to wear gloves and blindfolds and leave their hand in the box. It turns out that there was a spider in the box and the girls had to face the fear of the unknown to accomplish the challenge.

We all came out of the talk with a better understanding of our own personal fears and how they prevent us from doing certain things. More importantly, we learned ways in which we can overcome these phobias and ensure that we are no longer held back by our fears and worries.

### Self-Care Workshops with Karen Morrissey

*By Sofia Gallagher*

Local stylist Karen Morrissey comes to the school to speak to all of the TY classes each week and runs workshops for us. Karen worked as a model when she was younger. To date, she has spoken to us about her modelling experience, and consequently setting up her own business. She now works with models and emphasised to us that it doesn't matter what type of body a person has, anyone can be a model if they want to. She is teaching us how to be confident in our own bodies and advises us not compare ourselves to others on social media. We discuss many different topics, most recently we spoke about fake tan and how we should apply it.

Karen has also spoken to us about many different skin products, and I personally found this to be a great help because it gave us a good idea of what products to buy and avoid. She explained how we can tell what skin type we have,

and advised us about what we can do to improve our skin and make it glow and look healthier.

One of Karen's main messages is that there is no need to cover up every day and spend hours upon hours on make-up, because everyone is naturally beautiful the way they are. She teaches us about self-worth and self-love and that we shouldn't want to change the way we are. I feel that Karen's visits are very helpful, informative and provide us all with an important message - be comfortable in your own skin!

## Segways for Schools

*By Sophie Grace*

A segway tour company visited the Presentation TYs during the week of October 5th. Our classes were split so we could all take part in the activity while also adhering to social distancing guidelines. We took part in this activity on the basketball courts, but on the second day some girls completed the activity in the Watershed as the weather did not permit outdoor activities.

During the activity, we completed an obstacle course on the segways. We had to manoeuvre in and out of cones, limbo beneath a rope and pass over a ramp - all on our segways. The instructors were very helpful and friendly and they made the experience an enjoyable one for everyone involved. Although some of us fell off, it was a lot of fun for everyone and we all had a great laugh!

## Lessons & Learning

### TY Monday Modules

*By Ava Daly, Sarah Walsh and Natalia Smolen*

Every Monday and Wednesday all TY students have a double class (80 minutes) of their chosen modules. We interviewed students from each subject to learn more about each one:

#### **Roisin Murphy, Junk Kouture**

*What is your favourite part of Junk Kouture?*

Designing and putting together the different parts of the outfit.

*What do you hope to achieve?*

I hope that my outfit makes it to one of the top three in the competition.

#### **Grace Walsh, Young Scientist Exhibition Competition**

*What is your favourite part of the Young Scientist module?*

Learning various new things about science.

### **Rebecca Kelly, Media Studies**

*What is your favourite part of Media Studies?*

Listening to so many different types of podcasts.

*What do you hope to achieve?*

I hope in the future that I will be able to create a good podcast myself.

### **Emma Burke, Law**

*What is your favourite part of Law?*

Learning about the system of the Law.

*What do you hope to achieve?*

I hope to have learned about all the different aspects of Law.

### **Ciara Heffernan, Global Schools**

*What is your favourite part of Global Schools?*

Learning about different nations and how we can help to make the world be more sustainable for the citizens who live in society today.

*What do you hope to achieve?*

I hope to find different ways to help the environment.

### **Natalia Smolen, Journalism**

*What is your favourite part of Journalism?*

Learning about different types of reports you can do.

*What do you hope to achieve?*

To write an informative newsletter for students and parents.

## **TY Wednesday Modules** *By Lucy Dunlop and Kenzi Fahy*

*Every Wednesday all TY students have a double class of their chosen modules. At the start of TY, we all had to choose one module from from the following options: Debating, Active schools, Mini companies, GAA Future Leaders and Coding. We spoke to the following students to learn more about their chosen modules.*

### **Aimee Quinn, Debating**

*What is your favourite part about debating?*

Mr Murphy is very passionate about debating and this brings out the positive atmosphere in the class, it is very interesting and exciting.

*What do you hope to achieve?*

I hope to improve my confidence skills and tools for planning, research and presentation.

*What do you hope to achieve?*

Setting up events that students will enjoy and find helpful towards their fitness. To encourage more students to be more active and to have a fitness goal.

### **Sadhbh Moran, Active Schools Flag**

*What is your favourite part about the Active Schools module?*

Helping the school stay active and fit by planning trips as a class.

### **Lucy Dunlop, Mini Companies**

*What is your favourite part about the Mini Companies class?*

Planning and coming up with a new product/brand.

*What do you hope to achieve?*

Learning the skills of being an entrepreneur.

### **Eilis Doherty, GAA Future Leaders**

*What is your favourite part about the GAA Future Leaders module?*

My favourite part about GAA future leaders is learning about all the different aspects of GAA and how you don't have to just be a player to be involved.

*What do you hope to achieve?*

To improve my camogie, responsibility, and leadership skills.

### **Libby Breslin, Coding**

*What is your favourite part of Coding?*

Planning and coming up with ideas for an app and learning new skills about technology and how to manage time skills while doing it.

*What do you hope to achieve?*

To be able to make my own app for a specific use whenever I want and be able to improve how I work with technology everyday.

## **New Subjects Choices in TY**

*By Julia Ruth*

This year, in TY we have a range of new subjects on offer to us, which we didn't have the opportunity to study in the previous three years. They are an addition to the timetable but are all enjoying them.

These new subjects include:

### IT:

This is a very fun and interesting class as we get to learn more about

technology. It helps us improve our typing skills, and teaches us how to manage our Google accounts, using various apps such as Forms, Sheets and Sites.

### Business Modules:

Every few weeks we rotate business modules. The modules include economics, enterprise and accounting. These three modules help us learn more about business and how adulthood works in the future.

### Applied Maths:

This is like regular maths except it involves statistics or

probability theory, and more geometry is included in it.

### Creative Writing:

Creative writing is a class in which students learn how to develop their creative thinking and become more descriptive in stories and speeches etc. It improves our writing skills.

### Agricultural Science:

This subject ties in with biology as students learn about dealing with food and fibre production and processing. It also expands our knowledge of farming.

### Career Guidance:

This is a very useful subject, as it helps us make a choice on what we want to do in the future and what career path we want to choose to study for the Leaving Certificate.

## Young Scientist Project

By Rachael Egars and Mante Butenkovaite

We interviewed Sophie Ryan from the Young Scientist module and asked her the following questions:

**What project are you entering in the Young Scientist Exhibition?**

*I am trying to produce food in a greenhouse using only water and nutrients. The aim is to change the outlook that children and students have on healthy foods.*

**How did you come up with this idea?**

*I noticed that students were eating unhealthy food. Hand in hand the waste and plastic production needed to be cut down, so by creating our project we can effectively do this.*

**What do you like about the Young Scientist module?**

*I enjoy this module because science is something I am good at and enjoy doing. I also came up with a good idea that I like and believe is important.*

## Open Night Plans and Preparations

By Gillian Fennelly

The annual Presentation Open Night is normally one of the school's biggest nights of the year, where the school community welcomes 5th and 6th class girls from around the county into the building to give them an idea of what it would be like to attend Presentation Secondary School. This year of course, the open night could not proceed as normal, so it was streamed live to prospective students and their parents on Youtube, and it was linked to the school's website for easy viewing access.

Mr Hallahan and a number of our teachers made short speeches explaining different aspects of the school. There was a specific focus on providing details about new option subjects that students do not study at primary school level, such as French, Spanish, Science, Business Studies, Art, Home Economics, Technical Graphics, IT and Music.

There was also a pre-recorded video shown, demonstrating the large range of the sports, music and extracurricular activities that take place in Presentation in normal circumstances.

The virtual open night was advertised through local media such as newspapers and radio, and feeder schools were informed of the open night via email. Word of mouth was also used as an advertising technique and the school encouraged all present students to spread the word.

The recording was done by a film crew from Dublin called "Video Works". Old photos and videos were also used. Everything was done according to government guidelines/restrictions and the hope is that many future students will tune in to get a taste of Pres-life.

The virtual night concluded with a live questions and answers round with Mr Hallahan and many viewers expressed huge interest in our wonderful school!

**PRESENTATION SECONDARY SCHOOL KILKENNY**  
**VIRTUAL OPEN EVENING**

Wednesday 21<sup>st</sup> October 2020, 7.00pm – 7.45pm Approx

WELCOME | PRINCIPAL'S ADDRESS | VIRTUAL TOUR | LIVE Q&A SESSION

## From Serbia to Ireland - A True Year of Transition

By Danica Kurtic

I am from Serbia and my arrival to Ireland this year has seen big changes for me; New friends, new teachers, a new school, new classes, a new town and a new country. The distance between the two countries is great, which means that the culture, customs and people are different.

One of the first changes I noticed is that the weather is very different; Serbia is a sunny country where it rains only during Autumn and Spring, while in Ireland it seems to rain almost every day! This is due to the climate which is also different as Ireland is an island surrounded by ocean, while Serbia is a continental country.

The culture, religion and way of life for people in both countries is very different. In Serbia, our religion is mainly Orthodox, while the majority of Irish citizens are Catholic. Also the streets in Kilkenny are small and narrow as it is a medieval city, whereas the buildings are much larger in my hometown of Sid in Serbia. Education is another big difference I notice. A school for girls was a strange novelty for me, as well as school uniforms. There are no separate schools for boys and girls in Serbia, all students go to a mixed school together and sit together in the classroom, and uniforms are not worn in Serbia. Although there are great differences between these two countries, both are beautiful in their own way and I am enjoying my stay in Ireland so far!

## Pres Life as an Exchange Student

By Lourdes Jimenez and Carmen Aguirre

Being an exchange student can be very difficult and this year with Covid-19, it is even more challenging than normal. We want to share our experience during our first month in Ireland studying in the Presentation.

When we first arrived from our home country of Spain, we stayed in quarantine for fifteen days with our host families. On September 9th we finished our quarantine, so we started school a few days later than the rest of the students.

Thursday 10th of September was our first day of school. We were really nervous because we didn't know anyone, but both the principal and the teachers welcomed us and they showed us around the school facilities and explained our timetables to us. The following day, we started our classes with fear of getting lost around the school- we were very nervous. Those feelings ended quickly when we realised that our classmates were helping us with

everything we needed and making us feel very welcome.

During the last few weeks we've been adjusting to life in an Irish high school which is very different from our Spanish ones. Some of the differences that we most notice were; the uniform, the fact that this is an only girls school, the different timetable and the subjects.

We have now been in Ireland almost two months, and we are very happy with how we are integrating here. We hope during the next few months to reach our objectives as exchange students, which are to improve our level of English, make new friends and become more mature!

## TY Trips

### TY Commences with the Bennettsbridge Walk

*By Ciara Bryan*

On the 9th of September, our TY coordinator Ms Reddy organised our first TY trip for the year group- the Bennettsbridge River Walk. This consisted of walking to Kilkenny

from Bennettsbridge, a pleasant 10km walk. We were advised to bring a packed lunch and water. We were accompanied by Ms Murphy, Mr Murphy, Mr Campion, Ms Skelton and Ms Reddy.

It was a beautiful and captivating walk along the River Nore. We walked through woodlands and grasslands where we passed cows and horses that greeted us as we walked by. The

trail was perfectly well marked so we found it impossible to get lost or go off track. We enjoyed each other's company and talked and had a laugh. We were all satisfyingly tired at the end of the 10km. It was a tiring day but at the same time, a well enjoyed excursion, and we all benefited from the fresh air and exercise!

### Walking Through History

*By Emily Kilgour*

At the beginning of October, all TY students took part in a medieval walking tour of Kilkenny City. This walk went from the Black Abbey to Kytler's Inn. Each class group went at different times throughout the week and the tour was a hit all round.

Firstly we walked from the school to Black Abbey, where we started our tour. We were given a lot of background information about the history of the Black Abbey, which we had known very little about until then. Most of us have lived in Kilkenny all of our lives and never knew about the rich and plentiful history of Kilkenny. The Black Abbey

was built as a Dominican Friary in the 1220's. It was thought of as a calm and safe spot as it sat just outside the original city walls of Kilkenny. After many eventful years the Abbey was restored and reopened as a place of worship in the 1800's.

The tour concluded with a visit to the jail underneath the town courthouse. I personally loved this hidden gem and we had no idea it was right under our noses this entire time!

## **An Outing to Dunmore East Adventure Centre**

*By Leah Aylward*

On the 12th and 13th of October, TY split into two groups to take part in fun-filled activities in Waterford. We set out from school at 8.15am and returned at 4pm.

Dunmore East Adventure Centre is situated on the harbour in Waterford. The activities here include the Wibit aqua park, kayaking, archery, rock climbing and cave exploration. We were split into smaller groups on arrival, and each group spent 2 hours on the Wibit and kayaking, and another 2 hours completing the land activities. We went rock climbing, attempted archery and broke out of an escape room. The caves were not open due to Covid-19 restrictions.

All TY students who went on this trip had a fantastic time, and we were lucky enough to have dry weather! I would definitely recommend this trip for future 4th year groups!

## **Creative Corner**

### **🎃 Halloween Activities 🎃**

We've compiled a list of the ten best ways to safely celebrate Halloween in 2020. From setting up a few festive Halloween games to cooking a spread of yummy foods, these ideas will help you make the most out of Halloween!

### 1. Go "Ghosting"

Create a treat bag of goodies for a friend or neighbour and leave it on their doorstep with a note inside to pass it on (as in, create a new treat bag and "ghost" someone else). It's a festive way to spread some socially distanced Halloween cheer.

### 2. Play a Halloween Game

A fun game of apple bobbing, wink murder or murder mystery is sure to be a hit!

### 3. Make a Spooky Snack

Since you might not be able to do traditional

Halloween activities like going to a haunted house or trick-or-treating with friends, you can channel more of your energy into creating a stunning spread of spooky snacks.

### 4. Make Spooky Sweets

Halloween is all about treating yourself — which means you should go all in on preparing a ton of sweets. Try something creative, like witch cupcakes, black cat cookies, or choco-pumpkin ice-cream sandwiches.

### 5. Put on a Halloween Playlist

No matter how small your Halloween party is, it won't be complete without some festive tunes. Blast your favorites and have a dance party or play a game of freeze dance.

### 6. Get Crafty

There are plenty of crafts that you can do, such as paint-splattered pumpkins. Simply paint pumpkins a solid color and then splatter a different color over it using a toothbrush.

### 7. Decorate

A little bit of Halloween decorating can put you in the perfect mood for the spooky shenanigans of the day.

### 8. Host a Virtual Party

Get some treats, put on a costume and invite your friends to a Halloween FaceTime, Zoom etc. party.

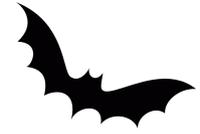

### 9. Take a Nature Walk

Explore your local areas and enjoy all of the autumn weather.

## 10. Watch a Spooky Movie

There's no more classic Halloween activity than watching a scary movie. Make a night of it by preparing some popcorn and candy and setting a spooky scene. Here's a variety of festive movie suggestions you can watch:

- The Conjuring (2013)
- The Addams Family (1991)
- Addams Family Values (1993)
- Dark Shadows (2012)
- Monster House (2006)
- Halloween (1978) (2018)
- Insidious (2010)
- Corpse Bride (2005)
- Child's Play (1988) (2019)
- A Quiet Place (2018)
- The Cabin in the Woods (2012)
- Hocus Pocus (1993)
- Halloweentown (1998)
- The Nightmare Before Christmas (1993)
- Frankenweenie (2012)
- The Haunted Mansion (2003)
- ParaNorman (2012)
- Friday the 13th (1980)
- A Nightmare on Elm Street (1984)
- Scream (1996)
- Get Out (2017)
- Coco (2017)
- Beetlejuice (1988)
- Edward Scissorhands (1990)
- Ghostbusters (1984)
- Hereditary (2018)
- Casper (1995)
- Rocky Horror Picture Show (1975)
- The Blair Witch Project (1999)
- The Craft (1996)
- Paranormal Activity (2007)
- Bram Stoker's Dracula (1992)
- The Shining (1980)
- Psycho (1960)
- Us (2019)

## Star Moments of Term 1 TY

By Hannah Roche and Sasha Mullins

The first two months of our TY year may not have been what we had expected due to COVID-19; nevertheless, as our readers will have seen by now, we have had a busy TY so far!

We interviewed a number of TY students asking about their favourite part of TY to date...

### What has been your favourite moment of TY so far?

*Ciara McHugh:* “My favourite moment of TY so far has been the segways because we got a break from school work for a few hours, and it was a really fun group activity!”

*Linda Ezermale:* “My favourite moment of TY is Junk Kouture.”

*Saoirse Mulcahy:* “My favourite part of TY is the fact that it is a lot more relaxed than third year and I am in the same class as most of my friends which is great.”

*Ciara Heffernan:* “I really loved the trip to Dunmore East. It was great fun!”

*Fiona Comerford:* “I enjoyed the segways the most, because it was a new experience for me.”

*Libby Breslin:* “My favourite part of TY is being with all my friends after not seeing them over lockdown”.

*Faye Fennelly:* “My favourite part of TY so far has been the Segways. I have

learned many new skills including balance and coordination, and it was really enjoyable”.

Myself and Hannah have really enjoyed the Karen Morrissey workshops and the segways.

As you can see, we have had many activities so far this year, even with the restrictions of COVID-19. We hope to enjoy many more activities throughout the year as we continue with our safe and enjoyable TY experience.

## Fun Features

By Klara Loszakiewicz

### Riddle Round

- 1) What question can you never answer yes to?
- 2) What is always in front of you, but can't be seen?

3) There's a one-story house in which everything is yellow. Yellow walls, yellow doors, yellow furniture. What color are the stairs?

4) What can you break, even if you never pick it up or touch it?

5) What goes up but never comes down?

### Fun Facts From Around the Globe

- The hottest chili pepper in the world is so hot it could kill you.
- Only two countries use purple in their national flags: Nicaragua and Dominica.
- There are around five million trillion trillion bacteria on Earth. (That's 5 with 30 zeros after it!)
- The coldest temperature ever recorded was -144 degrees Fahrenheit in Pakistan, 2017.
- Japan is the world's most earthquake-prone country with approximately 1500 small earthquakes each year!
- There are more than 24 time zones around the world.

Riddle Answers:  
1. Are you asleep yet? 2. The future, 3. There aren't any—it's a one-story house, 4. A promise, 5. Your age

## Thank You for Reading!

Go raibh maith agaibh, gracias, merci and thank you all very much for taking the time to read our first newsletter of the year! We hope you found it informative and interesting and that you'll tune in again for next term's news!
